AIR COMPRESSORS

DIRECT DRIVE

Our 'Direct Drive' compressors are built for the DIY craftsman to trades people wanting a small portable compressor for light duty applications. With the pump coupled directly to the motor these units have a duty cycle of 30% or where a compressor is required to run for no more than 10mins of continuous pumping.

Our 'Belt Drive' compressors are the choice for professionals. They have greater duty cycles and are the choice for professionals. With separate pump and motor this allows for reduced speeds and increased piston stroke, resulting in larger air deliveries.

BELT DRIVE
